

Summer@Rensselaer – Architecture Career Discover Program

Sunday, July 8 (check in) – Friday, July 20, 2018 (Check out 4 pm)

Course Objectives

This two-week class is designed to expose students to the experience of enrolling in a high-quality undergraduate architecture program.

Course Overview

The core of this course is studio work. In studio, students are immersed in a rigorous creative process that starts with the development of abstract models, and ultimately leads to the design of an exciting and innovative architectural proposition. Critique and evaluation of studio work is continuous, occurring in one-on-one discussion with the instructor and in larger group reviews with invited architectural critics. Studio work is complimented by a series of lectures and field trips. Lectures discuss the broader context of architectural practice; contemporary projects and practitioners; as well as more technical concerns such as drawing and model making. Field trips visit museums, where students learn about other types of creative practices, and significant works of contemporary architecture.
